EDUCATION

Cardiff University, UK – BSc Computer Science | Sept 2025 – July 2026

- Transferred from Taylor's University, Malaysia
- Final Grade: First-Class Honours
- Relevant Modules: Design Thinking and Prototyping for User Experience, Political Economies of Computing, Emerging Technologies

Taylor's University, Malaysia – BSc Computer Science, Specialised in Artificial Intelligence, Minor in Finance | Aug 2023 – Aug 2025

- CGPA: 3.87/4.00 | 3x Dean's List, Taylor's Excellence Award
- Rank 4 out of 100 – Supercomputing Competition
- Dual Award with University of the West of England
- Specialisation: Artificial Intelligence, Minor: Finance
- Developed an interactive game as part of coursework, applying object-oriented programming, game logic design, and user interaction principles to deliver a fully functional application
- Designed and built a prototype autonomous robot aimed at collecting surface waste in marine environments as part of a sustainability-focused project
- Relevant Modules: Machine Learning & Parallel Computing, Database Systems, Object Oriented Programming, Principles of Software Engineering, Advanced Programming, Risk Management

PUBLICATIONS

Integrating Cognitive Computing into Hospital Information Management Systems: A Comparative and Architectural Approach Using IBM Watson and Microsoft Azure | Preprints.org | Apr 2025

Darrshan A/L Mahendran et al. | Comparative research covering NLP, predictive analytics, cloud architecture, interoperability and AI ethics.

DOI: 10.20944/preprints202504.1778.v1

PROJECTS

Teaching Allocation System | Cardiff University – Final Year Project

- Designed and delivered a full-stack React 18 application automating teaching staff allocation across three campus sites, achieving a 95.8% fill rate and 75.4% average skill match
- Built a constraint-satisfaction engine using a greedy heuristic and weighted scoring for skill match, site proximity, workload and preferences; completed allocations in under 10ms vs ~35 minutes manually
- Developed dual admin/staff portals with analytics dashboards, timetable views and self-service functionality
- Conducted stakeholder interviews with Cardiff's Director of Academic Teaching Support and applied MoSCoW prioritization

FinGuard AI

- Developed an AI-driven financial vulnerability system in Python and machine learning, analysing 1,000+ simulated financial profiles across income, spending, savings, debt and disposable income
- Engineered 10+ financial indicators and developed a machine learning risk model classifying users into Low, Medium and High vulnerability levels
- Built an interactive Streamlit dashboard integrating data analysis, risk scoring, visualisation and personalised recommendations

RELEVANT EXPERIENCE

The Times UK – Interviewer | Jan 2026 – Mar 2026

- Conducted 25+ structured interviews within a 10-day survey window, achieving 100% target completion and zero data rejection
- First among 32 interviewers to reach the completion target, demonstrating initiative and effective time management
- Engaged students across 5+ faculties and 20+ degree programmes, managing scheduling, interviewing and reporting independently

LEADERSHIP & EXTRACURRICULAR

Cardiff University – Student Academic Representative | Oct 2025 – Sept 2026

- Represented students at Student Staff Panels and communicated feedback between students and the University

Cardiff University Badminton Team – Player

- Represented Cardiff University in competitions across the United Kingdom

World Bank Group Youth Summit – Virtual Delegate | May 2025

- Selected among 8,000 delegates to explore solutions in digitisation, climate action and creativity

Taylor’s University Student Council – Campus Welfare | Aug 2023 – Aug 2025

- Led student welfare initiatives, represented students in discussions with senior university management and supported resolution of campus issues

Taylor’s University Student Representative – School of Computer Science | Aug 2023 – Feb 2025

- Advocated for student needs and worked with university staff on classroom and common-area improvements
- Worked with the disciplinary board on student disciplinary cases

TECHNICAL SKILLS

Programming

Python, Java, C++, C, JavaScript, R, PHP, HTML, CSS, SQL, React, Node.js, MySQL, TCP/IP, Streamlit

Certifications

Oracle Java Foundations, Salesforce Data Science Explorer, AWS Cloud Practitioner Essentials, Bloomberg Market Concepts

Languages

English, Bahasa Malaysia, Mandarin, Tamil
